

22 System - Colour Options

The 22 System is a minimal suite of flush-mounted electrical and data components designed for installation into any material. To integrate with a variety of finishes, the collection is available in three colours: white, black and almond.

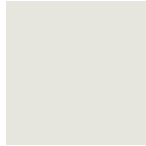

Custom colours and finish options are also available for larger orders, please contact us to discuss your bespoke request.

WHITE
RAL 9016

BLACK
RAL 9017

ALMOND
RAL 1013

Please take into account colour variance in screen and print. The RAL codes provided are the closest approximation.
